PRESS RELEASE

ELT presents its connectivity solutions in SCEWC and LuxLive fairs

Zaragoza 08/11/2018 – [ELT](http://www.elt.es), leading manufacturer of lighting components, will attend next week to 'Smart City Expo World Congress' and Lux Live' fairs. The Spanish company will present its connectivity solutions inside the 'smart cities' and lighting sectors.

SMART CITY EXPO WORLD CONGRESS

The [Smart City Expo World Congress](http://www.smartcityexpo.com), the most important annual event for smart cities will take place in Barcelona (Spain) from 13th to 15th November.

Among the novelties that ELT will present **STELARIA CityScope®**, a remote monitoring and control system for street lighting for use at local level, forming part of the ecosystem of solutions and tolos based on STELARIA®, its complete solution of street lighting management, interoperable with other urban services and 'smart cities' platforms. In the same way, it will be showcased **ALIS® and IDUS®**, solutions created, on one hand, to support the use of Big Data and AI (Artificial Intelligence) tools, among other options and, on the other hand, to allow the interoperation of the street lighting infrastructure with other vital city services.

The ELT stand will be in Pavillion 2, **booth F673** of Gran Via Fira Venue de Barcelona.

LUX LIVE

Additionally, ELT will take part, one year more, to [LuxLive](http://www.luxlive.com) which will take place, the biggest European annual lighting event. LuxLive will take place in London from 14th to 15th November.

This edition, [ELT](http://www.elt.es) and its UK supply partner [Prime Light](http://www.primelight.com) team up again to showcase its latest **product innovations, tools and comprehensive lighting and control solutions** for indoor and outdoor applications.

ELT will be in **booth K8** inside EXCEL exhibition centre of London.

About ELT:

ELT - Especialidades Luminotécnicas S.A.U. is Spain's market leader and one of the best-positioned sector companies in Europe, offering the design, manufacturing and marketing of power supply devices and wireless solutions for lighting management. Employing over 180 people, ELT is undergoing a process of digital transformation to become the leading company in the sector in the use of new technologies.
